

RMBL Graduate Seminar Series

8-9 PM in Barclay Classroom

June 23 - Karl Grunseich

>>> “The impact of changing species diversity on nutrient recycling by stream invertebrates”

June 30 - Ben Blonder & Kevin Buffington

>>> “Secrets of the naked leaf”

>>> “Predicting climate-induced shifts in burying beetle distributions: Integrating niche partitioning, competition, and thermal performance”

July 7 - Bryan McLean & Will Petry

>>> “Ecology of alpine mammals during the last glacial period: the story of the yellow-bellied marmot”

>>> ESA Practice Talk

July 14 - Jill Anderson & Zak Gezon

>>> “Quantitative trait loci underlying variation in flowering in different environmental conditions in *Boechera stricta*, a close relative of *Arabidopsis*”

>>> “The impact of land management on native bees and plant-pollinator interactions: A case study from Palo Verde, Costa Rica”

July 21 - Gretel Clarke & Christine Lamanna

>>> “Assessing the influence of ecological factors on gynodioecy in *Polemonium foliosissimum*: preliminary results”

>>> “Getting high with a little help from my friends: The role of facilitation in elevational advance of sagebrush with climate change”

July 28 - Kristjan Niitpold & Jessica Pratt

>>> “*Melitaea cinxia* shaken, not stirred: Mechanistic studies on dispersal in a butterfly metapopulation”

>>> “Plant adaptation to a resource cline has consequences for plant-herbivore interactions”

August 4 - Deidra Jacobson

August 11 - Bear Grinath & Dan Erickson

>>> Talks TBA
