

## Summer field technician position at RMBL

Researchers at the [Rocky Mountain Biological Laboratory](#) (RMBL) are seeking a research assistant in plant ecology for summer 2019. The field technician will primarily collect data for a [long-term flowering phenology](#) project, related demographic, and bee studies.

**Expectations:** Fieldwork can be strenuous and sometimes involves long days in inclement weather. Applicants with previous fieldwork experience and familiarity with Rocky Mountain wildflowers and/or bees are encouraged to apply, although no prior experience is required. We will train first-timers with a strong interest in ecology.

In addition to helping in the field five days per week, the technician will be expected to be an active participant in the research community. The technician will attend weekly seminars and lab meetings.

**Dates:** We expect the field technician to work from May to August 2019. However, start and end dates are flexible to accommodate the best applicants.

**Compensation:** The research technician will live onsite at RMBL. We will provide room and board, station fees, a partial transportation subsidy, and a stipend.

**Application:** Please send a short cover letter and resume to Rebecca Dalton ([rmd34@duke.edu](mailto:rmd34@duke.edu)) by **Feb. 1, 2019**.
