

Rocky Mountain Biological Laboratory Seeks Invasive Plant Technician

Position Description

The Rocky Mountain Biological Laboratory is now taking applications for an Invasive Plant Technician in 2019. We are looking for someone interested in invasive plant management and plant restoration. The employee's duties will include: 1) assisting with ongoing experiments to control the spread of Yellow Toadflax and test revegetation methods; 2) actively managing invasive plants by manual removal and spot applications of over-the-counter herbicides; 3) assisting in revegetation efforts by transplanting plants and collecting and sowing seed to restore native plants to disturbed sites; 4) coordinating adult volunteers; and 5) using GPS equipment to map invasive plants.

Conditions

We are looking for someone who is not afraid of hard work and has a sincere interest in active management of invasive plants, revegetation, and working with volunteers.

Note: Pets are not allowed at the field station. In addition, the field station is a smoke free campus.

Dates

This job runs from approximately mid-late June through mid-September. The chosen employee will work part time up to 200 hours during June-Sept., 2019.

Benefits and Fees

This job pays \$12-\$13/hour depending on experience. The employee is responsible for parking fees, if he/she has a car. There are no other benefits of this job.

To Apply

To apply for this job, please send a cover letter and resume with at least 2 references to Dr. Jennie Reithel, sd@rmbll.org

Applications will be accepted until the position is filled. We plan to choose an employee by June, 2019.

Questions

Please contact the Science Director Dr. Jennifer Reithel sd@rmbll.org

Additional information about RMBL can be found at www.rmbll.org

RMBL is an Equal Opportunity Employer.

The Rocky Mountain Biological Laboratory provides equal employment opportunities to all employees and applicants without regard to race, color, religion, national origin, gender, or sexual orientation.

The Rocky Mountain Biological Laboratory (RMBL), founded in 1928 is an independent, high-altitude biological field station near Crested Butte, Colorado. Our primary mission is to advance the deep scientific understanding of nature that promotes informed stewardship of the Earth. RMBL provides scientists and students access to diverse habitats, research and education infrastructure, a collaborative and internationally recognized scientific community, and a broad base of knowledge about the ecology of mountain environments.
